MORAL ISSUE
- In our congregations, reach out to other faith groups. Ask them to arrange a film screening. To succeed in a MORALtorium on future we need to recognize that this is a moral issue.
- Encourage your minister to speak of fracking and the climate crisis.
- Divest from fossil fuels in your church and personally.

ENERGY CONSERVATION
- In our churches, make sure we are doing everything we can to reduce our carbon footprint. Share the measures implemented with your congregation.
- In all of our work, be sure the carbon footprint issue is part of the discussion.
- A vegetarian’s carbon footprint is much less than that of meat eaters. Consider going this way for both health and the environment.
- Consider using an alternative energy supplier both in your congregation and at home.

STATE GOVERNMENT
- Use UUPLAN’s “Creating a Safe, Stable, & Sustainable Energy Future in PA” to educate your legislators about clean energy.
- Encourage the state legislature to create an environmentally responsible budget.
- Get involved with fixing gerrymandering. This is why we find ourselves where we are. See www.fairdistrictspa.com.
- Ask your legislator to cosponsor Christopher Robb’s legislation calling for 100% renewable energy by 2050.

FEDERAL GOVERNMENT
- Support the Frack Pack, which will close most of the Halliburton Loopholes.
- Support the Off Act (Off Fossil Fuels for a Better Future).
- Encourage Legislators to Join the Climate Caucus.

RECENT VICTORIES—DUE TO ACTIVISTS’ INVOLVEMENT
- Solar Jobs Bill Passed

This is only a sampling of how to engage. Please use our film Groundswell Rising...it inspires people to take action. See clips on the website.

The tide will turn on this, but only if we are united, and relentless.
